SEISA Song
～the STAR RAFT～

words Yasuo Miyazawa
music Seiko Saito

We gather in our school
Here we built our friendships
and learn the origin of the true sincerity
To search for the courage and the hope to live tomorrow

Ah SEISA our SEISA
Having a brave heart to survive

Learning together the spirit of SEISA
We understand each other
so the coming future will be full of hope
In our way lies the Star Raft
And in our heart the new power is brimmed

Ah SEISA our SEISA
Having a brave heart to survive

Ah SEISA our SEISA
Having a brave heart to survive

How to participate from online

SAAB2026 provides hints for the “Realization of a symbiotic society” that SEISA stands for.

Africa and Asia are attracting attention as regions of greatest change in the world, and the diversity of their peoples also hides great hints for harmonious coexistence. The history, traditions, and culture of humankind….

We would like to be a “bridge” between Africa and Asia countries, where we still do not know much about each other, and to build mutual understanding and connections. We hope that this event will further strengthen the relationship between Japan and the countries of Africa and Pacific.

Sponsorship SEISA Africa Asia Bridge executive committee

We'll do SAAB so the children
can think about the future
for themselves.
It's time to
start planting seeds.

What is SAAB

SEISA Africa Asia Bridge (SAAB), which was first held in 2015, marks its 11th edition this year.
SAAB was born out of the strong desire of Honorary Chairman Yasuo Miyazawa, founder of SEISA Group, to build a "bridge (HASHI)" between Africa and Asia for the future of children.
Africa is now known as a continent with a great deal of natural resources and it can be said to be the center of the world that attracts the attention of many people as a base for ICT development. We are now approaching a very important time to think about how we should deal with this change and what kind of attitude we should take toward the world in the next 10 to 20 years. With the aim of realizing the goals of children "knowing" about and "connecting" with African countries, SAAB is an event where people from various countries discuss the beauty and potential of diversity in Africa, and sympathize with each other.
In recent years, the use of online video platform enables us to talk with people from more countries.
We would also like to make SAAB as an opportunity to explore how Japanese can interact and connect with people overseas, and how we can act on the issues faced by various countries. We, SEISA, think "understanding each other, making friends instead of leaving someone out, and acting together" is the very important learning.
We hope this experience will be a seed for young people in Japan and overseas, who will lead the next generation, to think and act for themselves.
"SAAB is for children to think about their future. We are planting seeds for the future!"
We will inherit the thoughts of Honorary Chairman Yasuo Miyazawa and keep "seeding" for future children.

Welcome to the 12th SEISA Africa Asia Bridge 2026

Hajime Kaneko,
Chairman of the Executive Committee

SEISA Africa Asia Bridge was originally launched with the wish to encourage as many African and Asian nations as possible to participate in the Tokyo Olympic and Paralympic Games.
Today, however, Africa has transformed into a central hub of global attention, rich in natural resources. SEISA Africa Asia Bridge is a wonderful festival aimed at achieving the goal of helping young people deeply understand and build strong connections with African countries, while providing a platform to discuss the region's rich diversity and future potential. It is our hope that the experiences gained here will inspire meaningful exchange among the next generation of youth, both in Japan and around the world.

SAAB2026 Special Contents

Stage Event

3ch 11:50～

『War and Peace in the Law of the Jungle: How Will Japan Survive?』

Chikei project

Lecturer: Shin Sasaki, Professor at SEISA University
Conflicts continue around the world. Let's unravel their historical causes and the motives of major global powers, and together reflect on how each of us should live in this complex world.

2ch 11:50～

African Music Workshop

The djembe is a traditional West African percussion instrument characterized by its ability to produce a wide range of tones through variations in striking force and location using bare hands. While historically used primarily in festivals and ceremonies, it is now widely played across all musical genres.

2ch 12:50～

African Dance LESSONs

Lecturer: Yukiko Hashimoto
Having discovered African dance in her teenage years, Yukiko Hashimoto traveled abroad to study under master dancers. Upon returning from her initial study trip, she founded her own performance group and has since toured extensively nationwide. Her career includes performances at Ministry of Foreign Affairs-sponsored festivals and collaborations with Tokyo-based African artists. Currently, she leads workshops across Japan and abroad, designing classes aimed at promoting mind-body balance for participants of all ages.

Guest

Former Member of
the Japanese National Fencing Team
Motivational Speaker / TV Personality

Marino Kimura

- 2009: Champion, JOC Junior Olympic Cup
- 2014: Champion, All Japan Intercollegiate Fencing Championships (Individual & Team)
- 2015: Runner-up, U-23 Asian Fencing Championships (Team)
- 2017: 3rd Place, All Japan Fencing Championships
- 2019–2024: World Cup Competitor

Born in Shiga Prefecture, she was raised in a fencing family and began competing in earnest upon entering high school. During her high school years, she became the youngest member ever selected for the Japanese national team and went on to represent Japan in numerous international competitions, including the World Cup. After competing at the highest levels both nationally and internationally for many years, she retired from active competition in 2024. Today, she is active across a wide range of expressive fields—from coaching fencing and delivering motivational speeches nationwide to appearing in events, acting, and music. Drawing from her experiences of challenge and setback throughout her athletic career, she actively shares the importance of living authentically.

Para Surfing
Para Climbing
Para Rowing

Nagisa Ikegami

- 2023: Champion, All Japan Para Surfing Championships
- 2025: Member, Japan National Para Climbing Team
- 2026: Began competing in Para Rowing

Born in 1991 in Chiba Prefecture, she is a multi-talented para-athlete who balances her sports career with farming and raising three children. After giving birth at age 19, she developed a severe disability in her right hand due to the onset of an intractable disease (collagen disease) and an accident. Following rehabilitation, she began surfing in earnest in 2019. Overcoming obstacles, she consistently achieved strong results even in competitions alongside able-bodied athletes, ultimately becoming a World Champion at the 2023 ISA World Para Surfing Championship. Today, she continues to push boundaries across multiple disciplines—including para surfing, para climbing, and para rowing—drawing widespread attention for her unyielding determination.

2025 Officially recognized as a member school of the UNESCO Associated Schools Project Network (ASPnet)

2026 **Registered as an Official Program Celebrating the 75th Anniversary of Japan's Accession to UNESCO**

Message for the 1st SEISA Africa Asia Bridge(2015)

Yasuo Miyazawa

“Africa” is known to everybody. However, how far do we understand the real Africa? The image most people have as regards Africa may have something to do with lion, giraffe, elephant, etc. It is far away from us, physically and psychologically, and it is seldom that we feel it close to our daily life.

In the reality, however, the continent has more than 20% of the total land space of the earth, and there are more than 3,000 different languages spoken. In addition, it is said to be the birthplace of the human being. Africa will surely become more significant continent for Japan in 10 years, 20 years or 30 years, because it is very rich in natural resources. It is no exaggeration to say that Africa may be the only region capable of supplying enough natural resources to cover Japan’ s requirements. Therefore, it is very important for children who bear the future of Japan to learn about Africa and know its people, and do cultural exchanges

with them by taking every opportunity. It is true that Africa is far away in terms of distance, but in the near future the time may come when we can go to Africa in a few hours. Please think about how the transit time between Tokyo and Kyoto has changed from Edo-era, Meiji-era, Showa-era through today. Hence, it may not be unrealistic to reach Africa from Japan in 1-2 hours in the future. Physical distance will surely be shortened. In line with it, psychological distance should be shortened, too; Japan needs to be closer to Africa. Among Asian countries, Japan knows Africa better than others. Therefore, we should play a key role by strengthening relationship/friendship with Africa, making more efforts to establish the peace there and to assist them in further development as their good partner. It would be greatly appreciated if you would help us nurturing children and youth who have closer hearts rather than physical distance in both Japan and Africa. Thank you.

SEISA Africa Asia Bridge 2025 Event Report

10,593 Participants Gathered at a Global Festival of Learning to Build Bridges Between the Present and the Future

Under the theme "Knowledge Connection (Chikei): Learning and Connecting," we held the 11th SEISA Africa Asia Bridge 2025 (SAAB 2025) as a platform for fostering deeper connections with countries across Africa and Asia, promoting the realization of the Sustainable Development Goals (SDGs), and encouraging exchange among younger generations.

Blessed with favorable weather, the event was conducted both in person and online, with programs streamed across four channels. As in previous years, the event was co-hosted with the International Affairs Bureau of the City of Yokohama. SAAB 2025 was also recognized as part of a local government initiative promoting international exchange with African countries in conjunction with Expo 2025 Osaka, Kansai, Japan, and we were fortunate to receive a wide range of support through this program.

This year, embassies from 15 countries in Africa and Asia participated in the event, together with representatives from Japan, the United Nations Development Program (UNDP), New York Ikuei Gakuen, Rainbow International School, Marianas High School (MHS), Northern Valley Regional High School at Demarest (NVD), Northern Valley Regional High School at Old Tappan (NVOT), and Gunma Kokusai Academy (GKA). Including students and educators from these institutions, participants represented more than 40 countries, bringing total attendance to 10,593 people. Through their participation, we were able to further expand opportunities for learning, dialogue, and meaningful engagement.

At the Opening Ceremony, we were honored to receive remarks from Ms. Hideko Hadzialic, Resident Representative of the UNDP Representation Office in Japan; His Excellency Mr. Estifanos Afeworki Haile, Ambassador Extraordinary and Plenipotentiary of the State of Eritrea to Japan; Mr. Ichiro Aizawa, Member of the House of Representatives and Chairman of the Japan–Africa Parliamentary Friendship League; Mr. Hidehiro Mitani, Member of the House of Representatives and State Minister of Justice; Mr. Hirofumi Sato, Member of the Yokohama City Assembly and Chairman of the Japan–Africa Friendship League of the Yokohama City Assembly; and Mr. Hidetoshi Takeda, journalist and board member of New York Ikuei Gakuen.

During the 11th SAAB, students actively introduced the exhibition booths they had created to embassy representatives from participating countries. Numerous opportunities for interaction between students and embassy officials could be seen throughout the event, making SAAB a vibrant forum for exchange among the young people who will shape the future. Through booth presentations and English speeches delivered during the Opening Ceremony, students demonstrated the results of their daily studies and international exchange activities, earning high praise from participants and guests alike.

Looking ahead, SAAB will continue to strengthen its role as a bridge between Japan, Africa, and Asia; foster meaningful connections among younger generations; and contribute to the realization of all 17 Sustainable Development Goals. We remain committed to developing SAAB as one of Japan's leading international exchange festivals and a model of Education for Sustainable Development (ESD) in practice.

Finally, we will continue striving to make SEISA Africa Asia Bridge a place where children and young people can deepen international exchange and intercultural understanding while putting into practice the Three Guiding Principles of SEISA "Understand Each Other," "Leave Nobody Out," and "Make Friends." By expressing our core philosophy of Kyosei (living together in harmony) in diverse ways and working together with all who support this initiative, we hope to further enrich and develop SEISA Africa Asia Bridge in the years to come.

sTED (Seisa Transnational Education Design)

『sTED(SEISA Transnational Education Design)』is a program for the students to think about the future after 10,20 and 50 years from today and give their original presentations, based on the relationship between Africa and Asia and SDGs(Sustainable Development Goals).
Students who belong to SEISA all over Japan and nearby elementary, junior and high
school students also gather for giving passionate presentations.

"The SEISA National Student Council and Alumni Association" and SAAB

Under the motto "Seek no single right answer, just focus on doing things right," the SEISA Student Council and Alumni Association work daily to address issues both inside and outside our schools, aiming to realize an inclusive society. In Academic Year 2026, under the theme "Inheritance: Preserving Timeless Values Together," we are carrying out activities so that each individual can continuously speak about and pass on SEISA in their own words. At SAAB, we propose ways to transmit what we wish to pass down to future generations 10 or 20 years from now, framing these as "SEISA Heritage." Inspired by our activities through SAAB and the National Student Council, students build skills to pave new paths by taking on individual roles and responsibilities through presentations and learning opportunities that could not be achieved by a single campus alone. Over the years, SAAB has addressed diverse topics such as the SDGs, Well-being, and actions we can take today to build a better society. Having students and alumni who develop strong convictions through these Student Council activities stands as one of our major achievements.

Official UNESCO School Designation in 2025

SEISA High School and SEISA Junior High School have been officially designated as UNESCO Schools by UNESCO Headquarters in February 2025, in recognition of their longstanding commitment to the Sustainable Development Goals (SDGs) and Education for Sustainable Development (ESD). Our international exchange program, "SEISA Africa Asia Bridge," was selected as a domestic recommendation for the "UNESCO School/Japan ESD Award" in 2021. It has promoted educational activities aimed at building a sustainable society while deepening connections with the world. With this formal recognition, the entire Seisa Group will dedicate even greater effort to realizing the SDGs and practicing ESD, nurturing the ability in each and every student to create a society of "coexistence" for the future.

SAAB Simultaneous Class

We conduct "SAAB Simultaneous Class" to connect SEISA campuses and schools nationwide online, learning together for SAAB, gaining knowledge, and building connections. Each campus researches themes related to regions like "Africa" or "Asia" (covering history, food/clothing/housing, culture, climate, religion, geography, industry, etc.). On SAAB day, students present their findings on stage or via on-demand broadcasts. Students also learn video editing techniques and presentation skills beforehand. We look forward to your support for their presentations on the day.

Report:The 9th Tokyo International Conference on African Development

Toward a Future of Africa-Asia Partnership

From Wednesday, August 20th to Friday, August 22nd, TICAD9 was held in Yokohama, where collaboration with African nations in the fields of education, culture, and economics was discussed.
Principal Kaneko of SEISA High School was invited to the reception hosted by the Prime Minister and the Mayor of Yokohama following the conference, where he was also requested to continue supporting SAAB.
Furthermore, Ambassador Norio Maruyama, who oversaw TICAD9, has consistently demonstrated an understanding of Seisa's philosophy of "growing together" through SAAB.
This exchange served as an opportunity to reaffirm Seisa's ongoing international progress.

11th New York Overseas Study Program: United Nations Visit

On October 16, 2026, as part of the 11th New York Overseas Study Tour, 61 students from the SEISA Group visited the Office of the Special Adviser on Africa to the United Nations (UNOSAA). During the hour-long session, five UNOSAA officials, including one Japanese officer, joined the event, where students presented their ongoing initiatives in international exchange and overseas study programs. The students also shared the results of fundraising efforts carried out to enrich and expand exchange opportunities for youth worldwide, conveying SEISA's core concept of Kyosei (living together in harmony). The UNOSAA officials extended an encouraging message, urging the students to continue serving as a bridge to connect young people and to further advance the international exchanges they have sustained over the years. Building on the insights gained from this visit, we will expand individual small actions into connections with people around the globe. Together, we aim to build a peaceful world where everyone can live with peace of mind and smiles, contributing to the achievement of SDG 16 (Peace, Justice and Strong Institutions) and SDG 17 (Partnerships for the Goals). In closing, the UNOSAA officials praised SEISA's efforts through the SEISA Africa Asia Bridge (SAAB)—which promotes practical SDG initiatives and deepens intercultural understanding—and encouraged the students to continue demonstrating leadership. Marking this visit as a new step forward, we will remain committed to deepening mutual understanding through international exchange and advancing the realization of an inclusive society.
